

Ready-to-use. Domain-verified. Built for real banking implementations.

WHAT ARE BANKLY PACKS?

- Ready-to-use functional test case collections — structured, domain-verified, execution-ready.
- Covers banking and trade finance — no starting from scratch, no missed scenarios.
- Two formats: HTML (Single User) and Google Sheets (Multi-User, live sync).
- Works with any platform — Finastra, Intellect, Veefin, Temenos, FLEXCUBE, Finacle.
- Aligned with UCP 600, SWIFT MT/MX, NPCI, RBI guidelines, and banking best practices.

■ FORMAT 1 — HTML · Single User

- Open in any browser — no installation needed.
- Pass/Fail/Blocked/N/A buttons. Checkbox module export. Works offline.

■ FORMAT 2 — Google Sheets · Multi-User Live sync

- Share one link — unlimited users, all updates sync live.
- Auto dashboard. Module assignment. Native Excel/PDF export.

■ Sample Test Cases Available on Request

QUALITY & COMPLETENESS

- All four scenario types: Positive, Negative, Edge Cases, and Boundary tests.
- Each TC: Scenario, Pre-conditions, Numbered steps, Expected result, Priority, Type.
- Aligned with UCP 600, SWIFT MTs, NPCI, RBI circulars, and banking best practices.
- Real-world edge cases from live bank implementations — not textbook theory.
- Designed by the Bankly domain team — 17+ years of banking and IT consulting.

WHAT'S IN EVERY PACK

- Interactive HTML file — execute and track UAT live in any browser.
- Google Sheets version — shared team UAT with live auto-updating dashboard.
- Module-wise checkbox export — select any combination of modules for CSV.
- Bankly branding, version label, and contact details on every format.
